BRIEF ABSTRACT OF LETTER

Submits for sanction draft bye laws relating to Conservancy & Sanitation under Sec 48 (1) (n) of the Mysore Municipal Regulation framed by the Mysore M.C.C.

NOTES AND ORDERS

Though Inbo Sec 48 (1) (n) gives these bye laws a very broad scope, matters dealt with falling under the other Inbo Secs of this Sec have to be excluded

The draft bye-laws, except 529, seem to be unobjectionable

Serial

3 Bye law 5 It is not clear how far the drying of bratties on the external sides of walls affects general sanitation. If this is unsanitary, then being dried on the inner sides of walls is equally unsanitary. There is no doubt these bratties make the external walls unsightly but this is not synonymous with insanitation.

4 Bye law 9 The feeding of cows & other cattle on stable refuse is no offence under the Mysore Municipal Regulation. It is not known if the practice of feeding cattle on stable litter prevails to any extent in the Davangere Municipality. It is doubtful if the MLC are competent to frame this bye law.

5 Bye law 8 Though this affects general sanitation it comes more appropriately under market bye laws.

5 The citizens made the following suggestion with reference to these draft bye laws, -

" ~~1st~~ Para 1 The following may be added 'And private lands for short periods' and the Resolution of the MLC thereon is 'passed' "

6 Bye law 7 also recommended for orders

8 Bye-law 5. I agree with the remarks in the above note of drying of brattees on the external side of walls is unsanitary. Drying them on the internal side would be more so. Considering the difficulty that exists for fire-wood in Davao and the fact that the greater portion of the inhabitants are agriculturists, it will be next to impossible to put a stop to the practice of using Cow-dung to make brattees. At any rate it will be a great hardship if it is prevented. So instead of imposing restrictions which are unworkable & hard to work, the bye-law itself may be deleted.

9 Bye-law 9. Although this is a very desirable bye-law, I don't know if the Councils are competent to frame such a bye-law. It may therefore be omitted.

10 Bye-law 7. The same remarks apply to the Bye-law. Such cases will be rare besides any man who does such a thing cannot expect to get a conviction for a more serious offence under the I.P.C.

11. With reference to the Citizen's suggestions, it is undesirable to permit an unrestricted storage of manure in private lands. ~~But~~ At the same time it is impossible to overlook the inconvenience that will be caused to the inhabitants most of whom are agriculturists if they are required to deposit all rubbish mentioned in Sec 127 (most of which make very good manure) in the dust bins or compelled to remove them every day to the fields. As a sort of compromise between these two extreme courses, we may permit the storage of manure in approved private ~~places~~ lands, for short period, provided they are made innocuous by being covered with a thin layer of earth or other material so as to prevent the emission of effluvia. This is accordingly proposed -

12. A draft order approving the by-laws with the above modifications may be put up.
